

SCHEMES OF ARRANGEMENT

Schemes of arrangement continue to be an extremely popular method for pursuing public and private M&A transactions and as a means of reaching a compromise amongst creditors of a company. In part this can be attributed to the scheme's flexibility, predictability and relative ease of access to the courts. An additional factor in the context of creditor schemes is the absence of modern insolvency regimes such as the CVA.

Appleby's lawyers in the Crown Dependencies of Jersey, Guernsey and Isle of Man are experts in dealing with instructions from public and private companies contemplating takeover offers, potential bidders for public and private companies and companies seeking to compromise with their creditors, all of whom seek to utilise the scheme of arrangement framework as a means of achieving their desired corporate outcome.

Our experience in schemes of arrangement has exposed us to a diverse range of transactions spanning many industries and sectors including: Real Estate, Financial Services, Agriculture, Manufacturing and Telecommunications. Appleby's wider expertise in the Crown Dependencies in regulatory and financial services, employment law (including employee share option schemes), insolvency and restructuring, complements our offering when advising clients on schemes of arrangement particularly in the context of member schemes used to effect public or private takeovers.

Appleby's unique presence in the Crown Dependencies and other key international financial centres allows us to offer global expertise and perspective.

"They did a phenomenal job. They worked around the clock where necessary, and provided accurate and precise information and advice.

We really enjoyed working with them, it was a very cohesive team and a very well run file."
